

**International Symposium on Controversies in Vascular Surgery
Carotid Artery Disease
Rigshospitalet – Copenhagen Friday 31. August 2007 9:30 – 17:00**

Session 1 Basic Considerations

Børge Nordestgaard, Copenhagen: The plaque – Can the unstable plaque be differentiated from the stable plaque histologically? in the living human?

Jos v.d. Berg, Lugano: Carotid imaging – status and future (what is the role of MR?)
Bo Norrving, Lund: Are we underperforming carotid revascularisation? If yes, what could be the explanations and measures?

Session 2 Management

Mike Horrocks, Bath: Volume/quality relationship in carotid revascularisation (CEA and CAS)
Jan Brunkwall, Colone: Does carotid revascularisation merely prevent embolisation? Focus on cerebral (cognitive) and hemodynamic effects
Henrik Sillesen, Copenhagen: Does aggressive medical management render surgery unnecessary?

Session 3 Technical Aspects

Horst Sievert, Frankfurt: Neuroprotection during CAS– techniques and evidence
Michael Gough, Leeds: Monitoring and handling of new deficits during and after carotid revascularisation
Thomas Mätzsch, Malmö: How to make sure that your carotid revascularisation is impeccable

Session 4 The Trials

Hans-Henning Eckstein, Munich: Carotid trial updates (CAS vs CEA) – the VS' view

Sumaira Macdonald, Newcastle: Status of CEA vs CAS – the IR' view
Ross Naylor, Leicester: Whats next – which trials are needed

Dinner at Restaurant Sans Souci, Frederiksberg C

Pris for deltagelse er 500 DKK, hvori er inkluderet frokost og kaffe, som betales ved indgangen og registrering til mig senest 1. August 2007:
